

For Resource Management

Sports and Recreation

Software for managing details relating to
Sports and Recreation Reserves

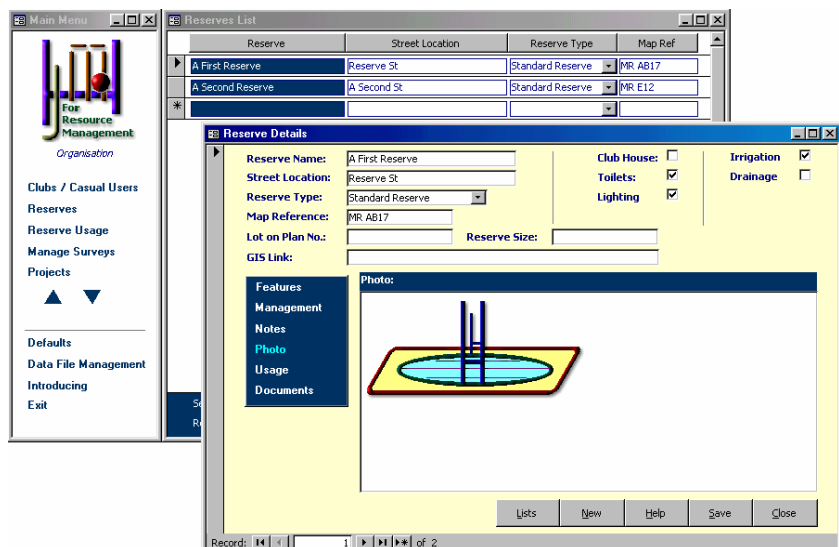

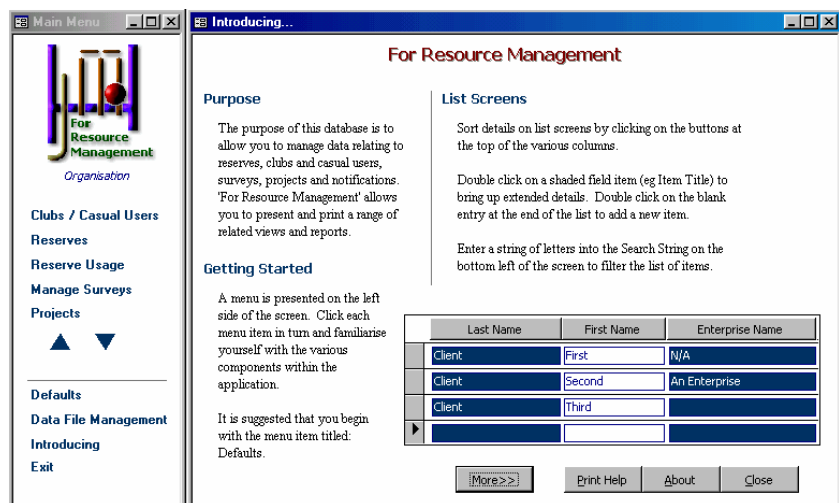

For Resource Management (Sport and Recreation) is a database application for the management of sports and recreation clubs and reserves:

- club and casual user details,
- reserve details and bookings,
- surveys and projects,
- club visits and notification letters.

For Resource Management (Sports and Recreation) contains the following components:

- **Club and Casual User details** (general and contact details, lease and AGM details, reserve usage and survey details).
- **Reserves** (general and contact details where applicable, reserve features and usage, photos and documents).
- **Reserve Usage** (booking of reserves and/or facilities by clubs and casual users).
- **Surveys** (add/edit surveys and survey questions, enter, edit, tally and query survey responses).
- **Projects** (a simple-to-use project management component for reserve development, maintenance, and other projects).
- **Letters of Notice** (for managing mail-outs and email messages to the various clubs and casual users).
- **Club Visits** (for managing visits and meetings with the various local clubs).

Manage various Projects

Customisation:

Budget Databases understands that no application will suit every organisation. Budget Databases' primary business is to develop custom designed applications from an appropriate template. In this way, many of the standard features can be delivered for the price of a shrink-wrap application, yet still allowing for the provision of customisation at reasonable rates.

Budget Databases

Enter Club and Casual User details

System Requirements:

This application was designed for use with Microsoft® Access 97 or later*. In order to run this application, you may need:

- a Pentium PC or better (with mouse),
- 16 MBytes of RAM or higher, depending on your Microsoft Access version.
- SuperVGA monitor running at 800 x 600 pixel resolution, 16 colours or better, and...
- approx. 30Mbytes of free hard drive space (not including the space required for the Microsoft® Office or Microsoft Access).

You need to:

- be running Microsoft® Windows® 95 or later,
- have a copy of Microsoft Access* currently loaded on the computer.

*** NOTE:** If you do not have a copy of Microsoft Access 97 or later, a 'stand-alone' version of *For Resource Management* can be purchased from Budget Databases. The stand-alone version however, will **NOT** allow you to directly add or update user defined reports.
